SLIDELOCK TROWEL SYSTEM

BRILLIANT!

Fast and easy blade changes. Handle attaches to the blade by sliding it along a full length spine which provides a strong secure handle attachment to the blade.

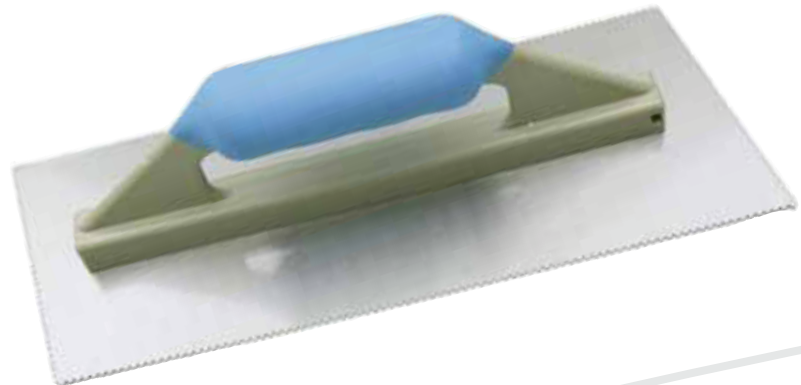

The *SLIDELOCK* system allows the same handle to be used with different notch size blades.

CHOICE!

SLIDELOCK Trowel System features either a large or small ergonomic soft grip handle fully interchangeable with 8 different blade styles.

This provides the most universal trowel selection available for the flooring market.

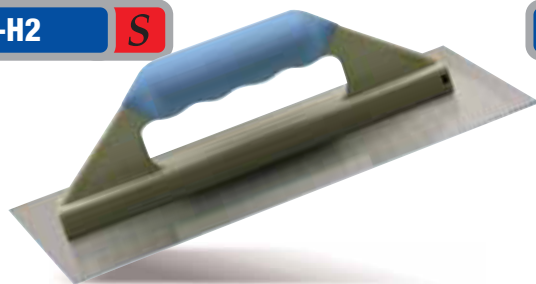

DURABLE!

Centrally located handle is easier for left handed users and reduces uneven wear on the blade notching. Both sides of the blade can be used without removing the handle. Simply turn it around.

All *SLIDELOCK* notched blades are the popular parallelogram shape and are manufactured from heavy gauge high quality steel and are double notched for long life.

17-H2

S

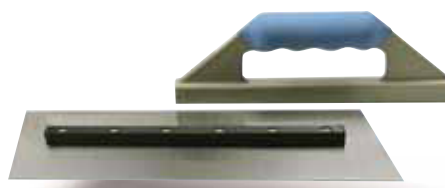

SLIDELOCK Trowel Handles

- ▼ Replaceable blade and handle trowel system
